EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Remarks

The above amendment is made to correct an obvious typographical error in claim 23.

Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed "cooking appliance with a cooking chamber, a toroidal-shaped waveguide, a magnetron as the microwave generator, a tubular feed member and a field flux generator including a field flux emitter arranged along the tubular feed member for shifting the microwave energy field prior to entry into the toroidal-shaped waveguide in order to create a uniform cooking environment for the cooking chamber" and the method are not shown and suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

18. The method of claim 17, wherein generating the field flux is constituted by producing a magnetic field about the tubular feed member.

19. The method of claim 17, wherein generating the field flux is constituted by producing an electrical field about the tubular feed member.

20. The method of claim 19, wherein the step of generating the field flux is constituted by operating a field flux generator on a pulsed DC current.

21. The method of claim 19, wherein the step of generating the field flux is constituted by operating a field flux generator on a rectified AC signal.

22. The method of claim 19, wherein the step of generating the field flux is constituted by operating a field flux generator on an AC current.

23. The method of claim ¹⁷~~16~~, further comprising: generating the field flux through a plurality of flux field emitters positioned along the tubular feed member.

24. The method of claim 17, further comprising: creating constructive wave interferences by combining the plurality of high energy standing microwave with a microwave energy field already in the toroidal-shaped waveguide.
